We are a 50,000 sq. ft. custom metal fabrication facility with both machining and fabrication capabilities. We specialize in steel, stainless steel, and aluminum.

We do custom bending, rolling, high-definition plasma cutting, shearing, and welding, in addition to CNC and manual machining.

With over 163 years of industry experience, we pride ourselves in customer service and excellent workmanship.

We sell to the guy off the street, to big businesses, and everyone else in between. No piece of steel or project is too small.

Same day service is available when applicable, and delivery service is handled thru a third party vendor for a fee.
